Back End Of Screen-2 :

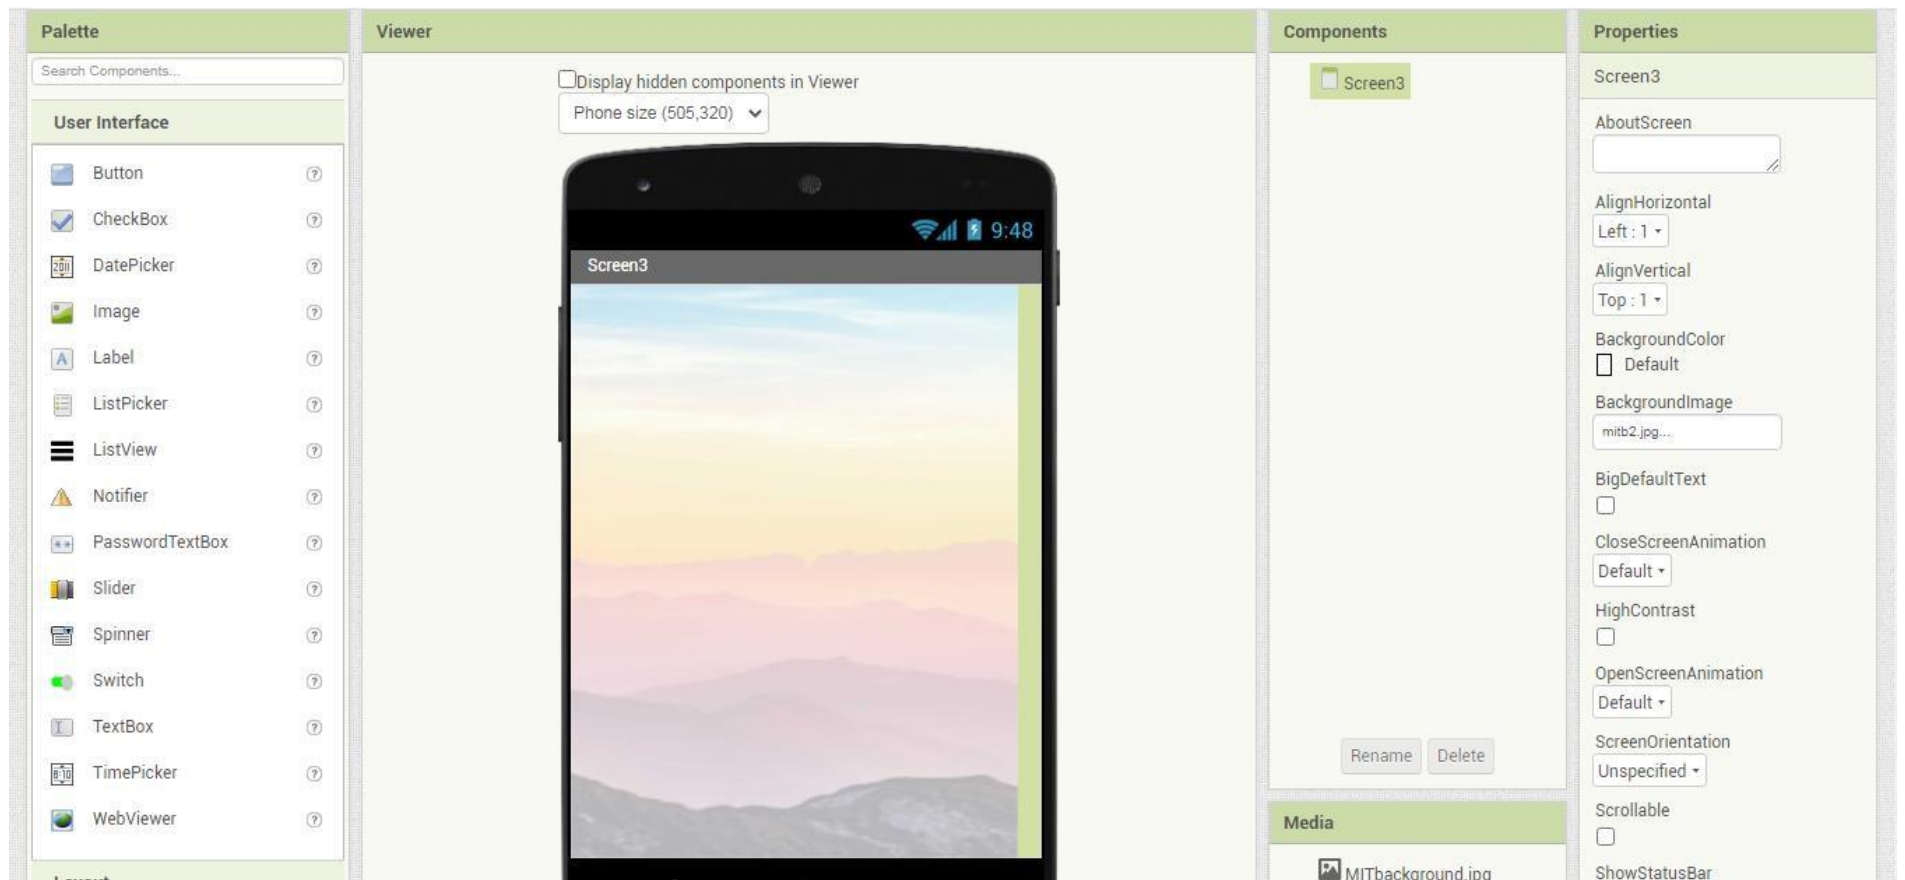

Front End Of Screen-2 :

Back End Of Screen-2 :

Screen-3 :

Realtime Database :

It is used to store the registered User name and Password.

The screenshot displays the Firebase Realtime Database interface. On the left is a dark sidebar with the 'Firebase' logo and navigation links: 'Project Overview', 'Authentication', 'Realtime Database' (highlighted), 'Build', 'Release and monitor', 'Analytics', 'Engage', 'All products', and 'Spark' (with 'No cost \$0/month' and an 'Upgrade' button). The main panel is titled 'GAS SENSOR' and 'Realtime Database'. It includes tabs for 'Data', 'Rules', 'Backups', and 'Usage'. A warning banner states: 'Your security rules are defined as public, so anyone can steal, modify or delete data in your database'. Below this, a JSON tree shows the database structure: 'GASSENSOR' containing 'Sajee: ""1234""' and 'sajee: ""123456""'. The URL bar shows 'https://gas-sensor-786b6-default-rtdb.firebaseio.com'. At the bottom, it indicates 'Database location: United States (us-central1)'.
